

Department of Physics, Oxford

Astrophysics Colloquia: Michaelmas Term, 2000

- September 28th Dr. M. Goss, National Radio Astronomy Observatory
OH Masers at 1720 MHz Associated with Supernova Remnants and the Galactic Centre
- October 17th Dr. G. Gilmore, Institute of Astronomy, Cambridge
GAIA
- October 24th Dr. L. Morales-Rueda, University of Southampton
Mapping the Peculiar Binary GP Com
- October 31st Dr. P. van der Werf, University of Leiden
Probing the Cosmic Star Formation History Longwards of $1\ \mu$
- November 7th Professor P. Sarre, University of Nottingham
*Diffuse Interstellar Bands:
The Longest Standing Problem in Astrophysical Spectroscopy*
- November 14th Dr. A. Ferrara, Osservatorio Astrofisico di Arcetri
The Feedback of Galaxy Formation on the Intergalactic Medium
- November 21st Dr. N. Vogt, Institute of Astronomy, Cambridge
The Evolution of Spiral Galaxies
- November 28th Dr. F. Sylos-Labini (Université de Genève)
Complexity in Cosmology
- December 5th Professor B. Gustafsson, University of Uppsala
Stellar Abundances

All colloquia will begin at **4.15 p.m.** in the Sir Martin Wood Lecture Theatre, except the seminar on October 24th which will be held in the Lindemann Lecture Theatre.
