

**Department of Physics, Oxford**  
**Astrophysics Colloquia: Michaelmas Term, 2003**

- October 14th    Dr Franz Bauer, Cambridge  
*X-rays from the Chandra Deep Fields*
- October 21st    Dr Martin Hendry, Glasgow  
*Gravitational Microlensing as a Probe of Stellar Astrophysics*
- October 28th    Dr Tim Roberts, Leicester  
*Do Ultraluminous X-Ray Sources Harbour  
Intermediate-Mass Black Holes?*
- November 4th    Dr Huub Rottgering, Leiden  
*The evolution of clustering of galaxies and AGN  
and the quest for proto-clusters*
- November 11th    Dr Marek Kukula, Edinburgh  
*Quasars and their hosts*
- November 18th    Dr Luciano Rezzolla, Trieste  
*Quasi-Periodic Oscillations as a Test of  
General Relativity in the Strong-Field Regime*
- November 25th    Dr Scott Trager, Groningen  
*Directly Detecting Galaxy Evolution from Starlight:  
Stellar Populations of Distant Galaxies*
- December 2nd    Dr Rosemary Mardling, Melbourne/Australia  
*Extrasolar Planets: New Challenges for Theory*
- December 9th    Dr Niranjan Thatte, Oxford  
*Commissioning and first results from the SPIFFI  
near-IR integral field spectrometer*

All colloquia will begin at **4.15 p.m.** in the Dennis Sciama Lecture Theatre in the Denys Wilkinson Building.
