

# Department of Physics - Oxford Astrophysics Colloquia

## Trinity Term 2008

All Colloquia will begin at 4.15pm in the Dennis Sciama Lecture Theatre.

J Devriendt, AE Lynas-Gray, Mark Sullivan and Stephen Justham

Date	Speaker	Title
22 April	Sylvain Chaty (CEA Saclay)	How to reveal the most obscured high energy sources of our Galaxy
29 April	Prof Peter Read (Oxford)	Banded jets and circulation in gas giant planet atmospheres
6 May	Dr Gary Ferland (Kentucky)	The Emission-Line Spectra of the Highest Redshift Quasars: Implications for the Starburst and Active Nucleus Phases
13 May	Prof Richard Bower (Durham)	The Flip Side of Galaxy formation
20 May	Prof Rob Kennicutt (Cambridge)	New Insights into Star Formation in Galaxies from Spitzer and Herschel
27 May	Dr Graham Wynn (Leicester)	Feast and Famine: Feeding Black Holes and Supernovae Type Ia in Long Period Binaries
3 June	Dr Angela Taylor (Oxford)	Observations of the CMB and galaxy clusters using the Cosmic Background Imager
10 June	Klaus Meisenheimer (MPIA Heidelberg)	A Mystery Unveiled: VLT Interferometry Resolves the Dusty Tori in AGN
