

Department of Physics, Oxford

Astrophysics Colloquia, Michaelmas Term, 2010

- October 5th Dr. Aris Karastergiou (Oxford)
LOFAR, pulsars and radio transients
- October 12th Prof. Paul van der Werf (Leiden)
Probing the Dark Hearts of Luminous Infra Red Galaxies
- October 19th Dr. Catherine Heymans (Edinburgh)
Charting the Dark Universe with CFHTLenS
- October 26th Prof. Andrew Hamilton (Colorado)
The Physics of Black Hole Interiors
- November 2nd Dr. Suzanne Aigrain (Oxford)
TBA
- November 9th Prof. Seb Oliver (Sussex)
HerMES: The Herschel Multi-Tiered Extra-galactic Survey, obscured star formation in the distant Universe.
- November 16th Dr. Carole Mundell (Liverpool)
Gamma Ray Bursts in the Era of Rapid Follow-up
- November 23rd Dr. Emanuele Daddi (Saclay)
The different star formation modes of distant massive galaxies
- November 30th Prof. Peter Coles (Cardiff)
Cosmic Anomalies
- End-of-year special *Details TBC*

Colloquia start at **4.15pm** in the Dennis Sciama Lecture Theatre, DWB. Tea and coffee from **3.45pm** in the Level 7 interaction area, with wine and cheese following the talk on Level 5.

M. Sullivan, J. Devriendt & A.E. Lynas-Gray
