

Department of Physics, Oxford

Astrophysics Colloquia: Michaelmas Term, 2015

- October 12th Dr. R. Breton (University of Manchester)
Black Widows, Redbacks and Transitional Neutron Star Binaries
- October 19th Professor C. McKee, University of California at Berkeley
The Role of Magnetic Fields in Star Formation
- October 26th Professor M. Gieles, University of Surrey
The Formation and Evolution of Globular Clusters
- November 02nd Professor J. English, University of Manitoba
A Constellation of Results from the “Continuum Halos in Nearby Galaxies – an EVLA Survey”
- November 09th Dr. A. Alonso, Instituto de Física de Cantabria
The Complex Evolutionary Paths of Local Infrared Luminous Galaxies: A High Angular Resolution Mid-Infrared View
- November 16th Dr. T. Murphy, University of Sydney
Exploring Gamma-Ray Bursts and Other Transients with Next Generation Radio Telescopes
- November 19th Hintze Lecture
- November 23rd Dr. L. Sironi, Harvard-Smithsonian Center for Astrophysics
The Journey of High-Energy Photons in Blazar Jets
- November 30th Dr. M. Kenworthy, Leiden Observatory
The Giant Exoring System Seen in Eclipse Around J1407b – Hints of Exomoons?

All colloquia will begin at **2.00 p.m.** in the Dennis Sciama Lecture Theatre, except the Hintze Lecture which will be at **5.30 p.m.** in the Sir Martin Wood Lecture Theatre.
